

Formative Assessment Tools:

1. [Kahoot!](#) - Gamified quizzes for immediate feedback.
2. [Padlet](#) - Collaborative boards for brainstorming and real-time responses.
3. [Pear Deck](#) - Interactive slides that allow real-time student responses during presentations.
4. [Edpuzzle](#) - Embed questions into videos for student interaction and comprehension checks.
5. [Socrative](#) - Quick quizzes and polls for gauging understanding.
6. [Formative](#) - An all-in-one platform for formative assessments, enabling teachers to assign tasks and give immediate feedback.

Summative Assessment Tools:

1. [Canva](#) - For students to design visually engaging projects, like posters or presentations.
2. [Book Creator](#) - Enables students to create digital portfolios or e-books as final projects.
3. [Seesaw](#) - A platform for students to create and submit projects that showcase their learning (Elementary).
4. [Google Sites](#) - Build websites for portfolio assessments or final presentations.
5. [Adobe Express](#) - Create multimedia reports, videos, or slideshows as summative projects.
6. [Turnitin](#) - Submission platform with plagiarism detection and detailed feedback tools.
7. [PBLWorks](#) - Resources to design comprehensive, real-world tasks for assessment.
8. [Quizizz](#) - Create customizable tests for end-of-unit evaluations that also analyze student performance.

Hybrid Tools (Useful for Both Formative and Summative Assessments):

1. [Nearpod](#) - Combines quizzes, polls, and interactive presentations.
2. [Microsoft Teams](#) or [Google Classroom](#) - Share assignments, assessments, and provide feedback seamlessly.
3. [Moodle](#) - Learning management systems offering integrated formative and summative assessment tools.
4. [Classkick](#) - Allows students to complete tasks while teachers give real-time feedback.
5. [Poll Everywhere](#) - Use for quick checks during instruction or for reflective assessments post-project.
