

Grade Level Balance Audit

A one-page check that a grade's six units, taken together, cover every IB key concept, learner profile attribute, and approach to learning, without leaning on the same few every time.

Used in

Step 4 of the Programme of Inquiry review

Who

Each grade-level team, preschool to Grade 5

Time

About 20 minutes per grade

1. Mark each unit

Put a dot under a unit's theme for every concept, attribute, and skill that unit focuses on.

2. Read across the rows

An empty row is a gap the year never touches. A crowded row means one element is overused.

3. Rebalance

Adjust lines of inquiry, attributes, or skills in the units until every row is covered.

Reading the totals: every key concept and skill appears two or three times across the year, and every learner profile attribute appears at least once. No gaps, nothing overused. This is what a balanced grade looks like.

Gaps and adjustments. Which rows are empty or crowded, and what will we change?
